

Leger

REPORT

Perception of the State of California

Survey of U.S. Residents

**LA
Times**

DATE 2024-02-14

Methodology

Method

Online survey among respondents 18 years of age or older.

(U.S. sample: n= 1,004).

Respondents had the option of completing the survey in English or in French and were randomly recruited using LEO's online panel.

When

January 26 to
January 28, 2024

Margin of error

For comparison purposes, a probability sample of this size yields a margin of error no greater than $\pm 3.1\%$, (19 times out of 20).

Weighting

Results were weighted according to **age, gender, region, education, ethnicity and number of people in the household** in order to ensure a representative sample of the American population.

Methodology

Significant differences

Data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion than that of other respondents.

Rounded data

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

Questions

Have questions about the data presented in this report? Please contact Christian Bourque, Executive Vice-President, Eastern Canada at the following e-mail addresses: cbourque@leger360.com

A more detailed methodology is presented in the Appendix.

Methodology

Leger is the polling firm that has presented the most accurate election survey data, on average, over the last ten years in Canada. During the last federal election in 2021, Leger was once again **the most accurate firm in the country**. This accuracy is attributed to the quality of the LEO panel and rigorous application of methodological rules by Leger's 600 employees, including 200 professionals in Leger's eight offices across Canada (Montreal, Toronto, Quebec City, Winnipeg, Calgary, Edmonton and Vancouver) and in the United States (New York).

Poll aggregator 338Canada.com gave Leger the highest rating among all polling firms in Canada for the accuracy of its studies. See <https://338canada.com/pollster-ratings.htm>

Key highlights

Some of the key highlights of our survey about the Perception of the State of California include...

- Over a third of U.S residents believe that California is a model other states should avoid (39%), compared to 15% who think it should be copied and nearly half (46%) who believe it is a little bit of both. Democratic voters (25%) are more likely to say it is a model to copy, whereas Republican voters (66%) are more inclined to think the opposite.
- 87% of U.S residents agree that the state of California is too expensive (cost of living), 76% agree with the fact that it is diverse, and 65% consider it a good place to visit. Nearly half (52%) believe it is an unsafe place, and only a third (37%) think it is a good place to raise a family.
- 23% of U.S residents not living in California would consider moving there, as opposed to 77% who would not. The main reasons for considering a move are employment opportunities (26%) and the warmer/mild climate (23%). The main reasons against moving, aside from a general reluctance to move (38%), are that it doesn't correspond to their way of living (20%) and disliking the politics there (19%). Republican voters (30%) are more likely to reject the idea of moving there due to the politics.
- More than half of U.S residents (58%) believe that California has a positive impact on the United States, while 42% think it has a negative impact. Democratic voters are more likely to view California's impact as positive (87% compared to 33% among Republicans).
- Generally, Republican voters are significantly more likely to have a negative opinion or rate the tested items more negatively, compared to Democratic voters who have a more positive perception of the state of California.

REPORT

Detailed Results

California as a Model State

Q1. Based on what you know about California, is it a model ...

Base: All respondents (n=1,004)

REPORT

Detailed Methodology

Weighted and Unweighted Sample (1/2)

The table below presents the U.S. geographic distribution of respondents before weighting.

	Unweighted	Weighted
US Region	1,004	1,004
NorthEast	195	180
MidWest	204	210
South	390	381
West	215	233

Weighted and Unweighted Sample (2/2)

The following tables present the demographic distribution of respondents according to gender and age for the United States.

	Unweighted	Weighted
Gender	1,004	1,004
Male	483	489
Female	521	515
Age	1,004	1,004
Between 18 and 29	88	191
Between 30 and 39	218	178
Between 40 and 49	186	164
Between 50 and 64	281	252
65 or older	231	219
